

Project Evaluation Rubric (1–5 scale)

1. Correctness (30%)

- Meets requirements: prompt design, chaining, RAG, error handling

2. Code Quality (25%)

- Modular, clean, maintainable, includes testing

3. Resilience (20%)

- Handles failures, retries, rate limits gracefully

4. Documentation (15%)

- Clear README, setup guide, explains trade-offs

5. Creativity / Bonus (10%)

- Extra features: authentication, dashboard, CI/CD, deployment

Scoring Guide:

1 = Incomplete or wrong direction

2 = Works partially, missing key elements

3 = Meets basic requirements

4 = Solid implementation with polish

5 = Excellent, production-grade with extra improvements
